

# Earthquake Safety Program

## Notification

### Notification of Construction

February 2010

Dear Rider:

As part of our system-wide Earthquake Safety Program, work is in progress to strengthen Daly City Station against earthquakes. **Starting late February 2010, construction crews will start work inside the station.** You can expect temporary construction-related noise, dust, and pedestrian detours. Enclosures will be constructed and two fare gates at the south end of the station will be closed. Please expect delays in passing through the remaining fare gates. On the back of this bulletin is a map of secondary fare gates that can be used.

Please watch for signs with safety information and other notices. We appreciate your patience and cooperation during this work.

#### **Construction Work Details**

- **Description:** Constructing temporary enclosures, adding steel and concrete to foundations, wrapping columns with reinforcement, and protecting utilities and equipment
- **Start Date:** Approximately early February 2010
- **Duration:** Through fall 2010
- **Hours:** Most work between 7:00 A.M. and 7:00 P.M. Monday through Saturday, with periodic night work and emergency work as necessary

Earthquake Safety Program construction will be underway at various locations throughout the BART system over the next five years and we expect to complete this project by the end of 2014. As always, safety is BART's top priority. Our aim is to strengthen BART as quickly as possible, while maintaining BART service.
